

## **Pharmacies that dispense Narcan Spray 2 voiles**

*What is Narcan™ (naloxone)?* Narcan™ (naloxone) is an opiate antidote. Opioids include heroin and prescription pain pills like morphine, codeine, oxycodone, methadone and Vicodin. When a person is overdosing on an opioid, breathing can slow down or stop and it can be very hard to wake them from this state. Narcan™ (naloxone) is a prescription medicine that blocks the effects of opioids and reverses an overdose. It cannot be used to get a person high. If given to a person who has not taken opioids, it will not have any effect on him or her, since there is no opioid overdose to reverse.

### **Naloxone (Narcan) kit from a Pharmacy**

There are two ways to access a naloxone rescue kit from a pharmacy:

1. Obtain a prescription from your prescriber and take it to a pharmacy that stocks naloxone. Many pharmacies are able to fill naloxone prescriptions or can order what they need.
2. Go directly to a pharmacy with a naloxone standing order and request a naloxone kit. For pharmacies with naloxone standing orders, a prescription is not needed.
